10.	Course objectives (competences): Experts in Teamwork is a course in which students apply their academic competence in interdisciplinary project work to learn cooperative skills that can be transferred to the workplace. Relevant issues from society and working life form the basis for the project work, and the student teams should work together with external partners. The student team must adapt the project that the team members choose, to suit their combined competence and the theme of the group. Students develop teamwork skills by reflecting on and learning from specific cooperative situations in their project work. Reflections are shared by the team and are stimulated by facilitation, reflection writings, interaction exercises, and feedback to each other.					
11.	Course content: Students in EiT are divided into groups of students, and each group is divided into interdisciplinary teams of five to six students. Each group is headed by a professor, called the group supervisor. Each group has a broad overall academic theme related to societal issues or challenges from working life. This theme forms the basis for the student team's project work. The group may have external partners that represent the theme, and that may be advisers and recipients of the students' work. The desired combination of academic competencies in the group is specified as a guide to help students choose a group.
